AD

Bugg Puppies will be ready to go June 12th. They were born April 12th. Bugg puppies are a hybrid cross between a 100% purebred Boston Terrier and a 100% purebred Pug. They are adorable puppies! They are vet checked and have had their first shots and are de-wormed. Their father is a beautifully marked Boston Terrier who is AKC registered. Their mother is a gorgeous fawn Pug (so sweet) who is also AKC registered. The parents are our pets and have been raised in our home. The Bugg puppies have a wonderful temperament and are extremely good with children. I even own a Bugg right now that is 2 years old, so you can see an example of what one will look like when it gets older! I also have many picture of what the puppies from my first Bugg litter looked like if you would like to see those.

Price: \$700

****Today's Pure Bred dogs suffer from a ton of predisposed genetic illnesses, most life threatening and some costing thousands of dollars in vet bills. This is due to closed breeding practices, and shallow genetic pools. Vitality, health, and intelligence are only a few of the benefits you will enjoy from our hybrid Buggs****
